Cardium Pro 3.0.0.70 CrackQ: Is
it possible to do a bulk insert of
a table with new columns into
another table using SqlBulkCopy
class I have a project using
Entity Framework where I need
to create some tables and loads
of data through EF into those
tables. I am using SqlBulkCopy

to move the data from the source tables to the target tables. The problem is that I have a table that I don't know how many columns this table will have so I have created a temporary table (with the table I am copying from, and then a new table for the new table), and I am using a foreach loop for each new column I am inserting. I am wondering if this is the correct way to do what I need. Or is it possible to bulk insert a table with new columns without using the temporary

```
table? var columns =
tableCopy.Columns.ToList();
foreach (var column in columns)
{ SqlBulkCopy bulkCopy = new
SqlBulkCopy(this.Connection.Co
nnectionString); string
INSERT_STATEMENT =
@"INSERT INTO
[dbo].[TempTable]
([ColumnName1], 0cc13bf012
```
